ABOUT KOHSA ANALYTICS

Our team at Kohsa Analytics is dedicated to mitigating the climate crisis pertinent in India and the rest of the World at a larger level. We at Kohsa, believe in providing economical and effective solutions for water, air and land pollution. Let's form a community to help this World become a better place to breathe in.

WHY KOHSA ANALYTICS

Kohsa Analytics offer comprehensive environment management services to its clients. We also provide end to end services from setting up of the plant to its operations and maintenance. Kohsa Analytics tries to keep its cost minimum while maximising the quality and scope of the project.

We have multi - state expertise, which determines understanding of different locals & proven technical know-how. We at Kohsa also serve our clients with expert Environment Consultation. Our team at Kohsa Analytics is dedicated to mitigating the climate crisis pertinent in India and rest of the world at a larger level.

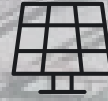

OUR SERVICES

SUSTAINABLE LIVING

SOLAR PANEL INSTALLATION

Solar Panels help convert the light energy from the sun to electrical energy. Kohsa Analytics provides its clients with advanced solar solutions to generate clean energy and save costs. Solar Panels save money in the long run as it cuts electricity bills and reduces carbon footprints.

MICRO WATER PURIFICATION SYSTEM

A micro water purification system improves the overall purity, smell, and taste of our drinking water. It removes elements such as chlorine, lead, and harmful bacteria. Kohsa Analytics offers a range of water purification systems that produce onsite disinfectants.

ELECTRIC AUDIT CONSULTANT

An electric audit helps in resolving the problems which are causing the use of more electricity than required, thus, causing damage to the environment. Kohsa Analytics provides its clients electric audit consultation, an electric audit is simply a calculation of how much electricity is being used and of where that electricity is going.

GREEN BUILDING CONSULTANT

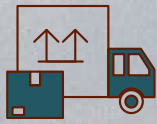

A 'Green Building' reduces or eliminates negative impacts, and can create positive impacts on our climate and natural environment. Kohsa Analytics offers its clients a wide array of services that assist in developing a new green building.

ZERO LIQUID DISCHARGE

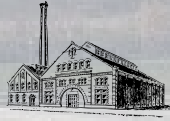

ZLD is an engineering approach to water treatment where all water is recovered and contaminants are reduced to solid waste. By operating an in-house ZLD plant, disposal cost can be reduced and fewer greenhouse gases are produced by off-site trucking, which minimizes impact on local ecosystem and the climate.

MAJOR KEY SECTORS WE SERVE
